

**MAY
MISSION OF THE
MONTH**

Founded in 1990, **Habitat for Humanity's** mission has been to build affordable homes for home buyers who are unable to purchase a house through conventional means. Many of the people they service are hard-working families who want to buy a home in the communities they already live and work in, but need help with financing. There are similarities in their housing circumstances: paying too much of their income towards their rent, living in overcrowded situations, moving frequently because of rent increases, not feeling safe in their neighborhood or their landlord not keeping up on important maintenance.

By partnering with **Habitat for Humanity**, families do not have to worry about any of those issues any longer. They are able to have the stability they long for and focus on the future.

The office of **Habitat for Humanity**, the building sites and the ReStore facility are currently closed until at least May 1st. An update of current projects could not be noted.
